

March 30-31, 2012 Carroll Knicely Center Bowling Green, KY 42101

You are cordially invited to attend the **1st Annual KY Nanotechnology Symposium**, hosted by Western Kentucky University, KY NSF EPSCoR and NanoNet. The conference will be held March 30-31, 2012 at the Carroll Knicely Conference Center in Bowling Green, KY. Our mission is to bring together micro and nanotechnology researchers within the South and Midwest regions. The symposium is open to all scientists, engineers and students from a wide range of disciplines involved in microtechnology, nanotechnology and advanced materials. The symposium also promises to expand the awareness of core facilities that exist within the region and cultivate new research collaborations. Presentations focused on advanced material synthesis, metrology and characterization, devices, education, and core facilities will highlight the symposium.
